

AMENDMENTS TO THE CLAIMS

Claims 1-4 (Canceled)

5. (Currently amended) A method of treating an allergen-induced inflammatory disorder in a mammal, comprising the step of administering to a mammal that is exposed to an allergen a therapeutically effective amount of a lactoferrin product, said amount being sufficient to reduce inflammation-induced Langerhans cell migration or accumulation of dendritic cells in lymph nodes.

6. (Original) The method of claim 5, wherein the mammal is a human.

7. (Previously amended) The method according to claim 5 wherein the allergen-induced inflammatory disorder features a local immune response characterized by increased production of TNF- α .

8. (Previously amended) The method according to claim 5 wherein the lactoferrin product is a naturally occurring lactoferrin.

9. (Previously amended) The method according to claim 5 wherein the lactoferrin product is a recombinantly produced lactoferrin or a biologically active analog thereof.

10. (Previously amended) The method according to claim 5 wherein the lactoferrin product is a biologically active fragment of lactoferrin.

Claims 11-20 (Canceled)

21. (Currently amended) A method of inhibiting in a mammal a dermal allergen-induced inflammatory response comprising administering to the mammal that is exposed to an allergen a therapeutically effective amount of lactoferrin product, said amount being sufficient to reduce inflammation-induced Langerhans cell migration or accumulation of dendritic cells in lymph nodes.

22. Canceled

23. (Previously added) The method of claim 21, wherein the dermal inflammatory response is mediated by TNF- α .

24. (Previously added) The method of claim 21, wherein the dermal inflammatory response is further characterized by Langerhans cell migration.

25. Canceled

FI 26. (Previously added) The method of claim 5, wherein the allergen-induced inflammatory disorder is contact dermatitis.

27. (Previously added) The method of claim 21, wherein the dermal allergen-induced inflammatory response is manifested as a contact dermatitis.

28. (Previously added) The method of claim 5, wherein the allergen-induced inflammatory disorder is psoriasis.

29. (Previously added) The method of claim 21, wherein the dermal allergen-induced inflammatory response is manifested as psoriasis.
